DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3, 6-9, 11, 14-16, 18, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over in view of Montague, U. S. Patent Application Publication 2001/0042009 in view of Smith et al., U. S. Design Patent 454,910. Montague teaches a label attached to a product, printed information, and computer readable medium coupled to the label. The computer readable medium can be in the form of compact disk 60, floppy disk, magnetic strip 410, bar code, etc., wherein the computer readable medium provides additional information concerning the product. Smith teaches a card with a magnetic strip, a separable tag attached to the card by perforations. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the label taught by Montague with a separable tag portion as taught by Smith to provide a means to provide additional information concerning the product while also provide an information means which can be permanently secured to the product.

1. Claims 5, 13, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Montague in view of Smith as applied to claims 1, 9, and 16 above, and further in view of Spector, U. S. Patent 5,090,561. Spector teaches a computer disk package

Art Unit: 3611

comprising a compact disc 10, a card 14 having a circular well 13 and holes/eyelets 15 and 16, and a pouch 17 for receiving the disk and card combination. The pouch can having holes created therein to align with holes 15 and 16 to mount the package on hooks on a board or wall. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the label taught by Montague and Smith with a pouch as taught by Spector to provide a means to protect the data storage region of the card from damage.

Response to Arguments

Applicant's arguments with respect to claims 1, 9, and 16 have been considered but are moot in view of the new ground(s) of rejection

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dilday et al., U. S. Patent 6,484,940 is cited to show a card having both magnetic and optical storage regions.
